PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

A MEDIUM OF THE R.R.I'S SERVICE TO ESTATES.
Articles are of direct practical use to planters.
Publication is on the first of each alternate month, issues being successively numbered.

19 56

R R I

LOCATION. The institute's laboratories and offices are at the third mile, Ampang Road, Kuala Lumpur.

CORRESPONDENCE. All LETTERS must be addressed to the Director, Rubber Research Institute of Malaya, Post Office Box 150, Kuala Lumpur. Special inquiries may be marked for the attention of particular officers. The address for TELEGRAMS is Searching, Kuala Lumpur. TELEPHONE: Kuala Lumpur 3351. PARCELS occasionally arrive without any indication of their origin. Senders' names and addresses should be written clearly on the outside of all packages, and the institute should be advised of despatch by letter or telegram.

PROHIBITED PLANT SPECIMENS. Attention of planters and others in territories outside the Federation of Malaya and the Colony of Singapore is drawn to the Malayan Plant Importation Rules which prohibit the importation into Malaya of any part of a plant, whether living or dead, unless it is accompanied by a permit issued by the Director of Agriculture, Federation of Malaya. No permit will be issued in respect of any diseased plant or any plant pest. Any plant imported in contravention of these Rules (whose object is to prevent the introduction of diseases or pests) will be destroyed without examination. Anyone outside Malaya who desires our advice on any matter that may require examination of living material must first inquire by letter.

ADVICE. Inquiries are invited from rubber producers in the Federation of Malaya, the Colonies of Singapore and North Borneo, and the territories of Sarawak, Brunei and Nigeria, who may require more detailed information applicable to their own special problems. Where it is considered necessary, visits will be made to estates in Malaya as convenient. Visits to estates in other territories are by special arrangement. The only visits for which charges are normally made are those of the institute's budding mandores. INTERVIEWS should be arranged by letter or telephone, as members of the senior research and advisory staff are frequently absent on visits to plantations. The institute is open from 8 am to 1 pm and 2 pm to 4 pm on Mondays to Fridays, and from 8 am to 12.30 pm on Saturdays.

EXPERIMENT STATION AND FACTORY. This station of the R R I is situated 16 miles from Kuala Lumpur, at Sungei Buloh on the Kuala Lumpur — Kepong — Kuala Selangor road. Visits may be made on Mondays or Wednesdays by arrangement. There is a guest house.

PUBLICATIONS. Subscription to all or any of our series of publications (*Planters' Bulletin, Journal, Reports,* and miscellaneous booklets) may be made by depositing $15 with us. An annual statement of account will then be submitted.

PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

A MEDIUM OF THE R.R.I'S SERVICE TO ESTATES.
Articles are of direct practical use to planters.
Publication is on the first of each alternate month, issues being successively numbered.

1952 1953

R R I

LOCATION. The Institute's Laboratories and Offices are at the third mile, Ampang Road, Kuala Lumpur.

CORRESPONDENCE. All LETTERS must be addressed to the Director, Rubber Research Institute of Malaya, Post Office Box 150, Kuala Lumpur. Special inquiries may be marked for the attention of a particular officer, if so desired (See Staff List in Bulletin No. 1, page 24). The address for TELEGRAMS is Searching, Kuala Lumpur. TELEPHONE: Kuala Lumpur 3351/2/3. PARCELS occasionally arrive without any indication of their origin. It is requested that senders will write their names and addresses clearly on the outside of all packages, and also advise the Institute by letter or telegram of their despatch. This is especially important for perishables, such as latex samples and plant specimens.

PROHIBITED PLANT SPECIMENS. Attention of planters and others in territories outside the Federation of Malaya and the Colony of Singapore is drawn to the Malayan Plant Importation Rules which prohibit the importation into Malaya of any part of a plant, whether living or dead, unless it is accompanied by a permit issued by the Director of Agriculture, Federation of Malaya. No permit will be issued in respect of any diseased plant or any plant pest. Any plant imported in contravention of these Rules (whose object is to prevent the introduction of diseases or pests) will be destroyed without examination. Anyone outside Malaya who desires our advice on pests or diseases or any other matters that may require examination of living material must first submit an inquiry by letter giving the fullest possible description of their problem.

ADVICE. Inquiries are invited from rubber producers in the Federation of Malaya, the Colonies of Singapore and North Borneo, and the territories of Sarawak, Brunei and Nigeria, who may require more detailed information applicable to their own special problems. INTERVIEWS should be arranged by letter or telephone, as members of the senior research and advisory staff are frequently absent on visits to plantations. The Institute is open from 8 AM to 1 PM and 2 PM to 4 PM on Mondays to Fridays, and from 8 AM to 12.30 PM on Saturdays.

EXPERIMENT STATION AND FACTORY. This station of the R R I is situated 16 miles from Kuala Lumpur, at Sungei Buloh on the Kuala Lumpur — Kepong — Kuala Selangor road. Visits may be made on Mondays or Wednesdays by arrangement with the Director of the Rubber Research Institute (see CORRESPONDENCE above). There is a guest house

PUBLICATIONS. A list of 'Publications of the R.R.I.' is available on request. Subscription to Planters' Bulletin may be made by depositing $10 with us.

PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

New Series — Contents — 1952

P B 1 (Botanical)

	Page
Editorial	1
Poisoning of Rubber Trees with Sodium Arsenite	3 *
A Comparison between alternate daily periodic and third daily tapping systems	8 *
A note on Hevea spruceana	12
Note on clone L.C.B. 1320	16 *
R.R.I. Publications	19 †
R.R.I. Staff List	22

P B 2 (Chemical)

Editorial: The Chemical Division	33
Meeting the Consumers' Requirements	34
Technical Classification of Rubber: Estate Procedure	39 *
A New Rubber to Replace Leather	46
Precoagulation of Latex	48
Packing of Samples for Examination by Chemical Division	50 *
A Rough Test for Bale Coating Powders	51 *

P B 3 (Pathological)

Editorial: The Pathological Division	53
South American Leaf Blight	54
Province of the Pathological Division	57
Suspected Bird Damage	61
Remarkable Malady in Young Budded Rubber	62
Discussion of Pests and Diseases at Bogor	65
Electric Fencing	67 *
Despatch of Pathological Specimens to the R R I	69 *

* *Articles so marked are of special value for reference purposes*
† *This is obsolete; see current list of 'Publications of the R.R.I.'*

Contents 1953

P B 4 (Soils)

	Page
Editorial: The Soils Division	1
Weed Control on Rubber Estates	2
Manuring of Young Rubber Plants	9
Seed Gardens for Estates	14 *
Leaf Sampling for Diagnosis of Nutrient Deficiency	21 *
Control of Root Disease in Young Rubber	22 *

P B 5

Editorial: Research Must Expand	25
Hand Pollination	29
South American Leaf Blight	35 *
A New Legume Bush Cover Plant: Flemingia Congesta	39
Prang Besar 86 as a Seed Parent	42
Inoculation of Cover Crop Seed	47 *

P B 6

Editorial	49
Stump Planting	50 *
Mouldy Rot	57 *
Latex Anticoagulants	61 *
Rhinoceros Beetle: A Warning	63
Soil Organic Matter and Krilium	66
Replanting and Malaria	68

P B 7

Editorial: Clone Abbreviation	71
R.R.I. '600' Series	72 *
Bare Back Baling of Sheet Rubber	87 *†
Identification of Water Based Bale Coatings	84 *
A Code for Clone Abbreviation	85
Stimulation of Yield of Rubber Trees	89

* *Articles so marked are of special value for reference purposes*

† *This article includes American specifications for talc and for bale coating solution, which are superseded on 1 December 1953. For the new test (under Sections 6 and 7), reference should be made to a forthcoming issue of Planters' Bulletin.*

P B 8

	Page	
Editorial: A Long Range Project	93	
Yield Maintenance of Mature Rubber Trees	95	*
A Case of Black Stripe	102	
Anthracnose	106	
Air Dried Sheet	107	*

P B 9

Editorial: History of Tapping	111	
Tapping: An Introduction	113	*
Fertiliser Treatment and Maintenance of Young Replantings	120	*
Yields from Clones and Selected Seedlings in Commercial Tapping	124	
The Yellow Tea Mite	126	
INDEX	127	

* *Articles so marked are of special value for reference purposes*

89	3rd in para. *c*	consequences. Although, in a series . . . . .
104	—	*Figures 1 and 2 were transposed in error*

Paging — The paging from P B 2 onward is quite straightforward, but the 'make-up' of P B 1 calls for comment. Unnumbered pages occur immediately after pages 4 (four, bearing photographs) and 12 (two, bearing photographs and drawings) respectively. The blank pages following page 29 are regarded for bibliographical purposes as being pages 30, 31, and 32. Note that page numbering recommences with P B 4 — *i.e.* at the beginning of a new year.
